CERTIFICATE OF MAILING

I certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Assistant Commissioner for Patents, Office of Initial Patent Examination, Customer Service Center, Washington, D.C. 20231, on 1-25-02, 2002.

Thomas M. Fisher, Reg. No. 47,564

REQUEST FOR CORRECTION OF FILING RECEIPT

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

Applicant respectfully requests that the filing receipt in the present application be corrected to set forth the correct filing date. Specifically, the filing receipt (copy attached) sets forth a filing date of October 26, 2001. However, the correct filing date is October 25, 2001.

In support of the requested correction, copies of the "Express Mail" mailing label (showing a Deposit Date of 10/25/01) and the Certificate of Mailing by "Express Mail" (setting forth a date of mailing of October 25, 2001) submitted with the present application, a copy of the

USPS internet page 'Shipping Center, Track & Confirm' page showing arrival date at processing center as October 25, 2001 (from <http://www.usps.com/shipping/epstrac.htm>), and the first page of the present patent application having the number of the "Express Mail" mailing label thereon as submitted to the U.S. Patent and Trademark Office, are attached hereto. In accordance with 37 C.F.R. §1.10, Applicant respectfully submits that the correct filing date of the present application is October 25, 2001. Accordingly, Applicant respectfully requests that the filing date set forth on the filing receipt be corrected to set forth October 25, 2001, as the application filing date. Applicant believes that no fee is due for this request; however, if a fee is due, then please charge the appropriate fee to deposit account 01-2384.

Applicant further requests that a new, corrected filing receipt be issued.

Respectfully submitted,

Thomas M. Fisher

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

METHOD AND APPARATUS FOR CALCULATING BLOOD FLOW PARAMETERS

CROSS REFERENCE TO RELATED APPLICATIONS

This application claims the benefit of U.S. provisional application No. 60/243,196 filed October 25, 2000.

BACKGROUND OF THE INVENTION

[0001] This invention relates generally to methods and apparatus for imaging systems and, more particularly, for calculating blood flow parameters.

[0002] Stroke is a leading cause of disability among adults in North America. A National Institute for Neurological Diseases and Stroke (NINDS) trial was the first study to demonstrate that thrombolytic treatment within the first 3 hours of symptom onset is beneficial to stroke victims. However, treating patients beyond the initial 3 hours of illness with a thrombolytic treatment may carry a risk of intracranial bleeding which has resulted in a setback in the use of thrombolysis. This setback in the use of thrombolysis has prompted the realization that a more rigorous selection of patients according to certain criteria may reduce the risk of intracranial bleeding and thus, extend the therapeutic window for this therapy beyond the current 3-hour limit to benefit more patients.

BRIEF SUMMARY OF THE INVENTION

[0003] In one aspect, a method for determining tissue type is provided. The method includes quantitatively determining a tissue blood flow (TBF) by deconvoluting $Q(t)$ and $C_a(t)$, where $Q(t)$ represents a curve of specific mass of contrast, and $C_a(t)$ represents an arterial curve of contrast concentration, and quantitatively determining a tissue blood volume (TBV) by deconvoluting $Q(t)$ and $C_a(t)$. The method also includes quantitatively determining a tissue mean transit time (TMTT) by deconvoluting $Q(t)$ and $C_a(t)$, and quantitatively determining a tissue capillary permeability surface area product (TPS) by deconvoluting $Q(t)$ and $C_a(t)$.
